

MIKAEL KOBAMA

Junior Full Stack Developer | AWS Cloud | React | Node.js | Java

São Paulo, Brazil | (11) 95109-5489 | kobama.mikael@gmail.com | br.linkedin.com/in/mikaelkobama | github.com/MikaelKobama | portfolio-kobamadev.vercel.app

PROFESSIONAL SUMMARY

Junior Full Stack Developer with a degree in Information Systems and hands-on experience building web applications with React.js, Node.js, TypeScript, Java (Spring Boot), and Python. First-place winner of the Hack2Hire hackathon, hosted by Escola da Nuvem (Jun/2026), with a fully serverless intelligent document analysis solution on AWS. Completed the Oracle Next One program (800h), building an AI-powered air traffic analysis application as the capstone project. AWS Certified Developer Associate and Cloud Practitioner, with AWS Certified AI Practitioner in progress; experienced in serverless architecture, containerization with Docker, and CI/CD pipelines. Advanced English (C1 - CEFR). Seeking to join an agile team to contribute with quality, continuous learning, and strong software engineering practices.

EDUCATION

Bachelor's Degree in Information Systems

Jan 2021 – Dec 2024

UNINOVE – São Paulo, Brazil

RELEVANT PROJECTS & EXPERIENCE

CrediFácil IDP – Serverless Intelligent Document Analysis Solution

Jun 2026

Hack2Hire Hackathon, hosted by Escola da Nuvem – Frontend & Lambda Developer | 🏆 1st Place

- Won 1st place among participating teams and advanced to the presentation stage with the event's partner companies;
- Worked on the frontend and Lambda functions of a fully serverless AWS architecture, combining Lambda, Step Functions, EventBridge, and S3 to orchestrate document processing;
- Integrated Amazon Bedrock Data Automation and Amazon Nova Pro (with tool calling) for automated document data extraction and interpretation, powering a credit score dashboard;
- Built a complete React/Vite application with a dark navy and violet theme, real-time status terminal, polling hooks, credit score dashboard, glassmorphism effects, and light/dark theme toggle;
- Diagnosed and fixed integration issues between API Gateway and S3 static hosting, including duplicate resource routing and incorrect Content-Type metadata on uploaded files.

Lead Generation Landing Page

2025

Freelance Project – Frontend Developer

- Built a landing page with Next.js for an independent client, focused on a clear presentation of the service and easy visitor contact;
- Integrated a contact form via EmailJS, allowing the client to receive messages directly by email without needing a dedicated backend;
- Delivered the project with basic usage documentation, giving the client autonomy to update content after launch.

Institutional Website – Full Stack Application

2023

Freelance Project – Full Stack Developer

- Built a complete web application for a services-industry client, with a React.js frontend and a Node.js/Express backend exposing REST endpoints consumed by the interface;
- Modeled and integrated a PostgreSQL database to store contacts and messages submitted through the form, with server-side validation;
- Deployed the application to a cloud environment, configuring environment variables and ensuring consistency between development and production.

Oracle Next One – Bootcamp Capstone

2025

Oracle & Alura

- Completed an 800-hour Full Stack training program focused on backend development, object-oriented design, and software engineering best practices in the Oracle ecosystem;
- Built an AI-powered air traffic analysis application as the bootcamp's capstone project, using Python for data processing and predictive modeling;
- Applied Clean Code, SOLID principles, automated testing, and collaborative version control with Git throughout the program.

TECHNICAL SKILLS

- Front-End: React.js, Next.js, HTML5, CSS3, JavaScript, and TypeScript.
- Back-End: Node.js, Express, RESTful APIs, TypeScript, Java, Spring Boot, Python, and basic GraphQL.

- Databases: PostgreSQL, MySQL, MongoDB, Redis, and DynamoDB (AWS).
- AWS Cloud: AWS Lambda, Step Functions, EventBridge, S3, EC2, API Gateway, IAM, Amazon Bedrock, and AWS SAM.
- DevOps & Tools: Docker, Git, GitHub, CI/CD, JWT, asynchronous processing, and basic Terraform.
- Best Practices: Clean Code, SOLID principles, TDD, serverless architecture, microservices, and REST.
- ERP: Basic knowledge of SAP ABAP.

SOFT SKILLS

Continuous Learning • Problem Solving • Teamwork • Proactivity • Adaptability & Resilience • Critical Thinking • Effective Communication • Time Management • Results Orientation

LANGUAGES

- Portuguese: Native
- English: Advanced (C1 - CEFR)
- Spanish: Basic (A2 - CEFR)

COURSES & CERTIFICATIONS

- 1st Place – Hack2Hire Hackathon, Escola da Nuvem (2026)
- AWS Certified AI Practitioner (AIF-C01) – Amazon Web Services (in progress)
- AWS Certified Developer Associate – Amazon Web Services (2025)
- AWS Certified Cloud Practitioner – Amazon Web Services (2025)
- Oracle Cloud Infrastructure Foundations – Oracle (2025)
- Oracle Next One – Full Stack Development Program – Oracle & Alura (2025)
- Remote Work Professional Certificate – CertiProf (2025)
- Scrum Master Professional Certificate – CertiProf (2023)
- Scrum Foundation Professional Certificate – CertiProf (2023)
